

Integration testing

Test your solution to the assignment you have been given in the Database course. (Any project)

Or, as a backup plan, use this (simple) project:

https://github.com/Cphbusiness-dat1sem-org/Glarmester_solution.git

Start by making a plan – How are you going to make your integration test (which approach, which method)

Which additional test would you make to supplement the integration test?

Write a couple of test cases

Perform the test.
